Run and Space Complexity of Fibonacci Sequence

S.Kunnanath

October 25, 2024

1 Recursive Solution

Time Complexity:

$$T(n) = n \text{ operations} \times O(1)$$

$$T(n) = O(n)$$

Space Complexity:

$$S(n) = n \text{ dictionary entries} \times \text{size of dictionary element}$$

$$S(n) = O(n)$$

2 Iterative Solution

Time Complexity:

$$T(n) = n \text{ operations} \times O(1)$$

$$T(n) = O(n)$$

Space Complexity:

$$S(n) = n \text{ dictionary entries} \times \text{size of dictionary element}$$

$$S(n) = O(n)$$
